

Marco Araujo

FULLSTACK DEVELOPER AND SOFTWARE ENGINEER

Dear Hiring Manager,

I am writing to express my interest in joining your team as a **Full Stack Engineer**, bringing 6+ years of experience building scalable, high-performance web applications with **TypeScript**, **React**, and **Node.js**, plus 2+ years of hands-on **Agentic Coding**. I enjoy roles where **solid engineering** and real **product impact** go hand in hand.

Most recently at Form Factory, I built high-traffic, server-rendered web apps with React, Remix, and TypeScript for US brands such as Chubbies and Turtle Beach. I **owned** features from technical design through deployment and monitoring, focusing on performance, SEO, and production stability. I also integrated third-party services through **REST** and **GraphQL** APIs, and instrumentation via **Sentry**, ensuring the applications stayed fast and reliable as they grew.

By building with AI tooling like **Claude Code**, the **Claude API**, **Agent Skills**, and **MCPs**, I can multiply throughput while keeping even higher quality standards, accomplishing tight deadlines with **confidence**, **test coverage**, and up-to-date **documentation**.

What I would bring to your company is the **commitment** and **judgment** to choose the simplest tool that solves the problem, and the habit of improving the application and **engineering standards**, and making your product better and more reliable.

I am available to start immediately and am comfortable working remotely with **distributed teams** across time zones, as I have done with companies in the United States and Brazil. Thank you for your time and consideration. I would welcome the opportunity to discuss how I can contribute to your team.

Sincerely,

Marco Araujo.
